SUMMARY

- **Data, Risk and BI professional with 11+ years of experience** supporting enterprise data management, data quality management, automation, and dashboard development to improve data solutions and decision-making
- Experienced in SQL and Python for building efficient data pipelines and Power BI semantic models for banking and finance clients
- Skilled in storytelling for both technical and non-technical stakeholders, enabling measurable business impact, including $1M revenue growth

SKILLS

Data Visualization & BI: Microsoft Power BI (DAX, Power Query (M Code), Data Modelling), Google Looker, MS PowerPoint
Programming Languages: Python, SQL
Relational Database: Oracle Database, Microsoft SQL Server
ETL & Cloud Services: Microsoft Azure Databricks, Microsoft Fabric (Gen1 Dataflows), Microsoft SSIS (ETL/ELT)
Low/No Code Tools: Power Automate, Power Apps, Microsoft Copilot Studio
Developer Tools: Git Version Control (GitHub), Jenkins CI/CD, Visual Studio Code
Project Documentation Tools: MS office, Word, Jira, Confluence, Trello

PROFESSIONAL EXPERIENCE

Tilray Brands, ON, Canada **Jun 2025 – Aug 2025**
Data Analyst Intern *(Functional Role: Data Analyst)*

- Developed Microsoft Fabric Gen1 Dataflows using Power Query (M) to transform ~2M ERP records (Acumatica, Rootstocks) for Power BI semantic models, reducing data preparation effort by 30%
- Developed a Master Planning Power BI dashboard to monitor weekly-to-6-month raw material demand, tracking 10+ KPIs (Key Performance Indicators) with MRP, procurement, and production teams, improving planning accuracy by 20%
- Designed a Power Automate workflow to extract 150K+ supply chain management records weekly into Excel and CSV formats, applying problem-solving skills to support data governance, and audit-ready reporting

Macquarie Global Services, India **May 2022 – Nov 2023**
Operational Risk Manager *(Functional Role: Risk & Data Analyst)*

- Built a Power BI executive dashboard for Capital and Liquidity teams using data analytics techniques to visualize 21+ Key Risk Indicators (KRIs), reducing overdue risk incidents by 50%
- Developed Enterprise Risk Management dashboards in Power BI by applying statistical techniques such as trend analysis, outlier detection, and data analysis, reducing residual risk exposure by 20%
- Strengthened regulatory reporting processes by documenting 10+ RCSA assessments in Confluence, partnering with first-line teams to validate control effectiveness against regulatory requirements
- Led business solutions by gathering requirements, aligning stakeholder management, and managing 10+ data projects through Agile methodologies and Kanban workflows, achieving 20% continuous improvement in on-time delivery

Moody's Analytics, India **Sep 2015 – Apr 2022**
QA Engineer *(Functional Role: BI Analyst)*

- Automated Basel II/III/IV reports regression testing and SIT/UAT/PAT validation using MS SQL (CTEs, window functions, performance tuning) and Python, improving data accuracy and reducing manual effort by 25%
- Developed comprehensive test plans, test cases, and test suites to validate business rules and business cases, performing data analysis that resolved 60+ critical issues, improving data quality by 35%
- Built BI Root Cause Analysis dashboards to track JIRA issues, action items, overdue key metrics, and KRIs, and delivered presentations supported by follow-up trackers in Confluence, improving issue resolution tracking by 25%
- Led Agile initiatives as Scrum Master by collaborating with business analysts and Dev/QA teams using Kanban, Jira, and Confluence, driving process excellence and improving project coordination by 50%

Newgen Software Technologies, India **Dec 2011 – Aug 2015**
Sr. Programmer *(Functional Role: Data Engineer)*

- Optimized PL/SQL preprocessing and data transformations by implementing an SSIS ETL medallion architecture migrating Oracle data to MS SQL Server, improving data processing performance by 35%
- Automated incremental migration of 5M+ records to MS SQL using Oracle 11g PL/SQL procedures orchestrated via Bash scripting and ETL workflows, reducing dependency on legacy enterprise systems by 80%
- Tuned SQL queries, indexing strategies, and ETL workflows by optimizing joins and implementing incremental loads, improving processing efficiency and reducing execution time by 30%
- Led Oracle SQL training for 50+ developers and testers through workshops, code reviews, and coaching, strengthening technical expertise by 35%

EDUCATION

- **Business Insights and Analytics** **Jan 2024 – Sep 2025**
  Humber Polytechnic, Etobicoke, ON | GPA: 3.6
- **Master of Computer Application** **Aug 2006 – Sep 2009**
  Maharshi Dayanand University, India | GPA: 3.21
- **Bachelor of Computer Application** **Jul 2003 – Jun 2006**
  Guru Gobind Singh Indraprastha University | GPA: 3.46

CERTIFICATIONS

- **Microsoft Certified: Power BI Data Analyst Associate (PL-300)** **Dec 2025 – Dec 2026**

KEY ACHIEVEMENTS

- **Spot Award at Macquarie Global Services (Q3 2022 & Q2 2023):** Recognized for demonstrating strong communication, and the ability to work independently
- **Maverick Award at Moody's Analytics (Q1 2020):** Awarded for leadership, communication skills, technical skills
- **Create Confidence Award at Moody's Analytics (Q4 2018):** Honored for being committed, motivated, enhancing stakeholder communication
